How to Choose Your Charger Configuration

A step-by-step guide for OEM / ODM orders

BEFORE PLACING AN ORDER

Confirm the product configuration step by step

To help us provide accurate quotation, production time, and customization options, please confirm the following items in order.

01 Choose the Housing Design

Select your preferred charger appearance from available models such as A01, A02, A03, and other housing options.

02 Confirm Shell Color

Standard colors can be selected from existing options. New custom shell colors require a minimum order quantity.

Custom color MOQ: 5,000 pcs or above

03 Select Plug / Socket Type

Confirm the required plug or socket type according to your target market, product standard, or customer requirement.

04 Choose Battery Type and Charging Current

Select Battery Type (Lead-acid Or Lithium-ion) and the suitable output current based on your battery capacity and charging requirement.

0.8A **1.0A** **1.3A** **1.7A**

05 Confirm Label & Packaging

Confirm whether you need neutral label, customized logo label, barcode, instruction sheet, or customized packaging.

06 Sample Confirmation & Order

After all specifications are confirmed, we can prepare quotation, sample, lead time, and production arrangement.

Selection Order:

Housing Design → Shell Color → Plug / Socket → Battery Type → Current → Label & Packaging
