

LÊ THANH BÌNH

BACKEND DEVELOPER INTERN

ABOUT ME

I am a recent graduate in Information Technology, eager to apply my knowledge and grow professionally. Although I have limited work experience, I am highly motivated to learn and develop new skills. I aspire to contribute to a creative and professional work environment, and to collaborate with a company in achieving meaningful accomplishments that benefit both the business and the community.

EXPERIENCE

Project: E-Commerce Backend API

March 2025 - Now

- **Project Description:** Engineered a scalable backend API for an E-commerce platform. Implemented core business workflows including inventory management, order processing, and secure user authentication integrated with Google OAuth. Leveraged Redis for caching and system performance optimization.
- **Framework:** NestJS
- **Database:** MySQL, MongoDB
- **Other Technologies:** Redis, Google OAuth, Cloudinary, Swagger, JWT.
- **Github:** <https://github.com/chilepxep/ecommerce-nestjs-project>

Project: Job Application System

December 2024 - March 2025

- **Project Description:** Architected and developed scalable RESTful APIs for an AI-powered applicant tracking system. Handled complex business logic for job workflows, smart CV parsing, candidate scoring, and granular role-based access control (RBAC).
- **Framework:** NestJS
- **Database:** MongoDB
- **Other Technologies:** Google Generative AI, Cloudinary, Supabase, Swagger, JWT.
- **Github:** https://github.com/chilepxep/job_application_nestJS

Project: Plant Sales _ Website

August 2023 - November 2023

- **Project Description:** Project for a plant sales simulation website with two user roles: admin and end user.
- **Framework:** Next.js
- **Database:** MongoDB
- **Github:** https://github.com/chilepxep/BanCayCanh_Admin
