

Levima Advanced Materials Corporation 联泓新材料科技股份有限公司

Development Milestones

Multi-Point Layout - Home and Abroad

Industrial Layout-

- Special high-end olefin deep processing industry chain
- Self-produced EO ensures stable supply
- More advanced unit with latest plant technology

New Energy Materials

Photovoltaic materials

New energy battery material

Bio-materials

Bio-based material

Biodegradable material

Electronic Materials

Electronic gases

Wet electronic chemicals

Photoresist Resin

Specialty Materials

Specialty surfactants

High-end optical resin

Specialty engineering materials

04 Specialty Chemicals

Specialty Surfactants

- Production capacity is 120,000 tons/year for specialty surfactants. Products are widely used in personal care, textiles, architecture, leather, agrochemicals, metal processing, photovoltaic cutting, and other fields
- Developed over 100 grades, serving as a major supplier to industry leaders such as Unilever, Liby, and Blue Moon

Levima Surfactants

Structure	Grade	DP / Application
2-pH alcohol+ EO	IP(Lutensol XP)	3/5/7(100%,89%,30%)/8/9
2-pH alcohol+PO+EO	IPL(Lutensol XL)	4/5/7/8/9
ISO-C13+EO	IT , TDA (Lutensol TO, MULTISO)	3/5/6/7/8/9/10/12/30/40
C12-C14+EO	AEO	3/5/6/7/9
EXXAL C10+EO	IN(Lutensol ON)	5/6/7
EO/PO/EO	BL	Low foaming detergent
PO/EO/PO	RBL	Low foaming lubricant
Block copolymer	DE4050/DP800(NS-500 LQ,DOWFAX D-800) BL10400/10500(Plurionic PE)	Dispersant
Castor oil ethoxylation	EL20/36/40	Emulsifier
Special Structure & Product		
Low foaming surfactant	FCB series, Plurafac LF series	
Isomeric alcohol +EO/PO	EFA105, EFA120, EFA130	
Special surfactant for laundry capsules	MSC99	

Honors and Awards

Be An Outstanding Advanced Materials Enterprise
